DST Update for Nice Systems

Mirra

Daylight Savings is set up in the configuration using rules to determine which Sunday of which month will start and end DST. These rules will need to be manually changed to reflect the Start of the Second Sunday in March, and the End of the First Sunday in November.

WordNet Series 2

DST start and end dates are manually configured in the software each year. Because of the OS/2 Operating System, this has been necessary on all software releases of the Wordnet Series 2.

For Assistance on manually changing the time, contact the BEI Customer Support Center for assistance.

WordNet Series 3

Contact the BEI Customer Support Center for assistance.

NCF III:

There is currently an optional Microsoft Windows Update #928388 which will make the necessary DST changes. According to this link <http://www.microsoft.com/windows/timezone/dst2007.mspx>, this update will be changing to a critical status.

For systems that do not have internet access, the TZedit utility can be used to manually configure the start and end of DST.

Contact BEI's Customer Support Center for assistance at 203-271-5225 or helpdesk@beiinc.com
